DISCLAIMER

The information contained in this presentation is for informational purposes only and does not constitute an offer to issue, or arrange to issue, securities or other financial products. The information contained in this presentation in not investment of financial product advice and is not intended to be used as the basis for making investment decisions. The presentation has been prepared without taking into account the investment objectives, financial situation or particular needs of any particular person. Before making an investment decision, you should consider, with or without the assistance of a financial advisor, whether an investment is appropriate in light of you particular Investment Needs, Objectives And Financial Circumstances. No representation or warranty, expressor implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions without limitation, any liability arising out of fault of negligence, for any loss arising from the use of the information contained in this presentation nor is any obligation assumed to update such information. Such forecasts, prospects or returns are by their nature subject to significant uncertainties and configencies. The information in this report that relates to Mineral Resources at the Trojan Gold Project is based on information prepared by MetalsX Limited as antipounced to the ASX on 18 August 2016 in its 2016 Annual Update of Mineral Resource and Ore Reserves.

Forward Looking Statements Caution

Contain statements contained in this document constitute forward looking statements. Such forward-looking statements are based on a number of estimates and assumptions made by the Company and its consultants in light of experience, current conditions and expectations of future developments which the Company believes are appropriate in the current current contained in this document consultants in light of experience, current conditions and expectations of future developments which the Company believes are appropriate in the current current current contained in this document consultants in light of experience, current conditions and expectations of future developments which the Company believes are appropriate in the current current current contained in this document considered reasonable by the Company are subject to known and unknown risks, uncertainties and other factors which may expect the actual results, achievements and performance of the Company to be materially different from the future results and achievements expressed or implied by such forwardlooking statements. Investors are cautioned that forward looking information is no guarantee of future performance and accordingly, investors are cautioned not to place undue relignce on these forward-looking statements.

Competent Person Statement

Information in this presentation that relates to Mineral Resource and Exploration Results is based on information compiled by Mr Peter Schwann who is the Managing Director of Anuma Resources Limited. Mr Schwann is a Fellow of the Australasian Institute of Geoscientists and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Schwann consents to the inclusion in the release of the matters based on this information and the form and context in which it appears. All exploration results reported have previously been released to ASX and are available to be viewed on the Company website <u>www.arumaresources.com</u> The Company confirms it is not aware of any new information that materially affects the information included in the original announcement. The Company confirms that the form and context in which the Competent Person's findings are present have not been materially modified from the original announcements. All historic data has been sourced from Western Australian Mineral Exploration reports (WAMEX) and has been validated by GIS validation procedures by Aruma staff and consultants.

Professor David Groves' advice to find significant gold deposits
• "Most gold deposits are strongly controlled by first-order structures such

• "Most gold deposits are strongly controlled by first-order structures such as craton margins or suture zones. The currently declining exploration success rate can only be reversed by selective district-scale exploration near first-order structures."

The 2016 GSWA Capricorn Seismic Report stated

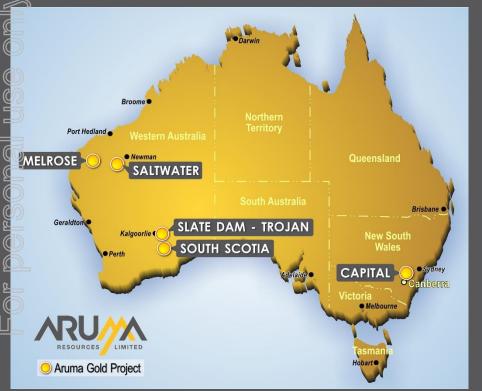

• "The Nanjilgardy Fault is a (450km long) major, mantle-tapping fault that marks the boundary between the Pilbara Craton and the Ashburton Basin. It is the main growth fault in the southern Pilbara."

Aruma's Peter Schwann

• "We have to be in underexplored areas with known gold, strong structures, reactive rock types intruded by hot granites and have potential for multimillion ounce gold discoveries."

Aruma's Projects

FOUR NEW GOLD PROJECTS:

- Melrose
 - 200km² adjacent Paulsens mine
- Saltwater
 - 463km² over Nanjilgardy fault
- Scotia South
 - 217km² over Scotia host extension
- Capital
 - 372km² near the Hume discovery

STRATEGIC GOLD PROJECTS

- Slate Dam-Trojan
 - 255km² with resource in Black Flag rocks

PILBARA GOLD PROJECTS

Attractions

- **Pilbara Location**
- Nanjilgardy Fault
 - 450km Crustal Suture
- 5M oz Corridor
- Lease Area 662km²
- Large Systems
 - Paulsens and Mt Olympus

ARUMA RESOURCES | ASX : AAJ

Melrose Gold Project

Location – Pilbara around Paulsens Mine ->1moz produced

Structure – Nanjilgardy Fault – Crustal Suture with splays – Multiple targets

Area – Large (199.6km²) strategic land holding

Gold Indicators

N N N

Ø

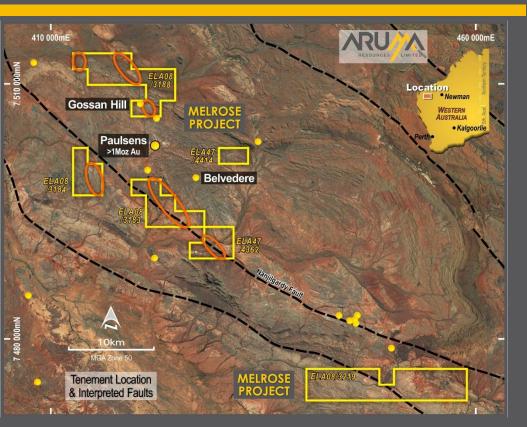

Ders

F0ľ

- Paulsens isn't the only deposit for 50km! (quote from Bill Beament)
- Rock chip and drilling >2g/t Au
- Drilling results of >20m >0.2g/t Au at Gossan Hill not followed up

www.arumaresources.com

Structural and lithological control understood

Melrose Gold Gossan Hill

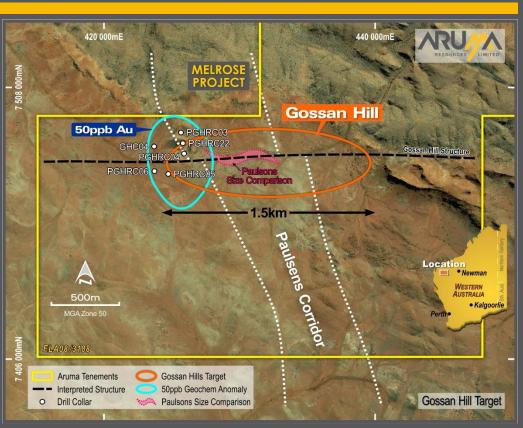

Location – 5km from Paulsens Mine ->1moz produced

- Area Large anomaly to be drilled
- Structure Paulsens Corridor Gossan Hill Structure
- Orientation East West like Paulsens (shown in red to scale)

Odd Indicators – Thick alteration zones below

|] | Drillhole | Depth | length of | Avg. >0.1 | 1m >1g/t | Depth |
|---|-----------|-------|-----------|-----------|----------|-------|
| 9 | Number | from | zone | Au g/t | Au g/t | from |
| | GHC0004 | 8 | 11 | 0.42 | 2.74 | 14 |
| 9 | GHC0005 | 0 | 29 | 0.14 | | |
| Ļ | GHC0006 | 63 | 18 | 0.26 | 1.44 | 63 |
| | PGHRC03 | 7 | 4 | 0.1 | | |
| | PGHRC04 | 49 | 14 | 0.25 | | |

Ø

SALTWATER GOLD PROJECT

<u>U</u>S **TSONAI** $\overline{\textcircled{0}}$ \bigcirc

Location – Pilbara around historic Saltwater gold area

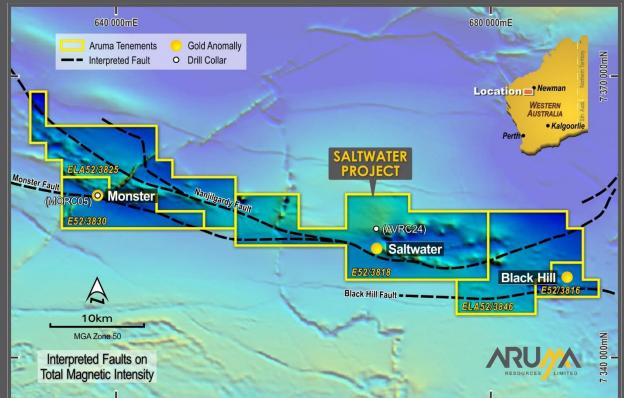

Structure – Nanjilgardy Fault – Crustal Suture with splays

Geophysics – 60km² coincident Magnetic-AEM ring

Area – Large (462km²) strategic land holding – 80% granted

Gold Indicators

- Historical nuggets at Saltwater and Black Hill
- Drilling results of >0.2g/t at Saltwater and Monster
- Large quartz vein and strong alteration visible

SCOTIA SOUTH GOLD PROJECT

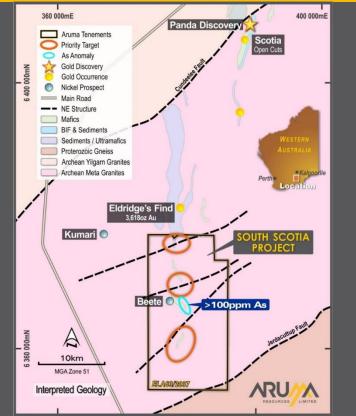

ⓓ đ Ć Derso F0ľ

- Location Extension of Norseman Wiluna Greenstone belt
- Structure Major NE sutures similar to Panda Discovery
- Geophysics Great anomalies and structures

Area – Large (217km²) strategic land holding on farmland

Gold Indicators

- Just south of Beete-Aldridge's Find gold mine
 - Produced 3,650oz from 4,690t at 24g/t Au
- Arsenic anomaly over geophysical structures
- Not drilled for gold
- Structural and lithological control understood

CAPITAL GOLD PROJECT

൘ R

Location – Lachlan Fold belt around historic Bywong gold area in NSW

Leases – Three leases approved for granting

Structure – Lake George Fault is a major crustal suture zone

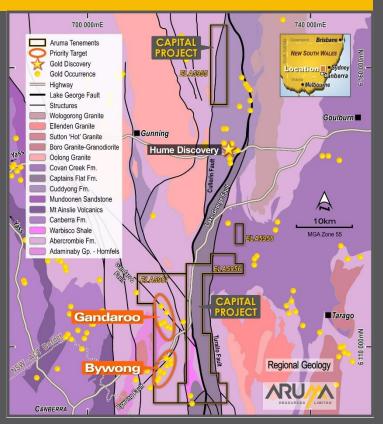

with splays similar to SKY's Hume Discovery

Geology – Hot granite driving hydrothermal gold in sediments

Area – Large (372km²) strategic land holding

Gold Indicators

- 1,500oz coarse gold produced from quartz veins in 1890s
- Area underexplored for lode material with invisible gold
- Structural and lithological control understood

SLATE DAM GOLD PROJECT

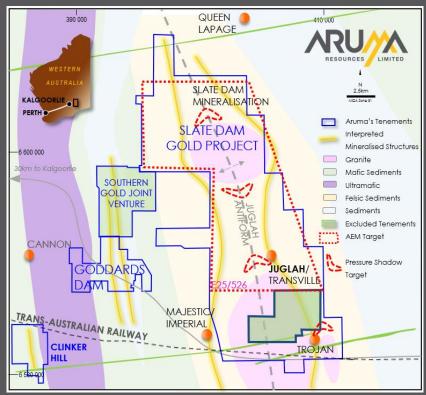

Location - 50km from Kalgoorlie

What's Important –

- Large (255km²) strategic land holding -100% owned
- Initial drilling by Aruma identifies large gold systems
- Historic gold production
 - 970t (27.6g/t) for 880oz. Au at Juglah/Transville
- JORC 2012 Resource at Trojan; 2.8Mt @ 1.61g/t Au for 145Koz. Au Underground option for 30-40Koz.

Airborne EM (AEM) survey

- Interpretation completed and priority targets drilled
- Drilling results anomalous and require follow up
- Soil/auger to look at pressure shadows near granite

TROJAN GOLD DEPOSIT

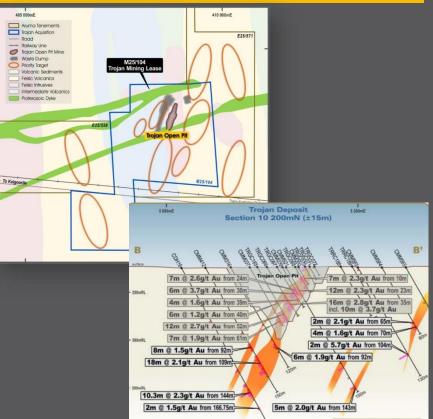

Location – 55km from Kalgoorlie

• Southern area of Slate Dam Project area

On Trend – 9km² Mining Lease ready to mine

What's Important -

- Produced 130,000oz. at 2.4g/t Au (2002)
- Contains 144,800oz. Au JORC 2012 Resource
- Includes intersections of
 - 18m @ 2.1g/t Au from 109m down hole
 - 27m @ 2.1 g/t Au from 125m down hole
- Open at depth and along strike
- Numerous exploration targets extend into Slate Dam leases
- Potential for near term mining to generate cash

personal FOr

Ready For Large Gold Discoveries

Prospective 250km² land package assembled within 70km of Kalgoorlie 4 new gold projects (1,251 km²) secured and 100% owned \$1.3M cash in bank...additional \$2.7M due post current placement = \$4M

PCOMING VALUE DRIVERS – DRILLING PLANNED FOR COMING QUARTER

- □ New gold endowed projects in underexplored areas with Saltwater granted
- □ Sale of selected non-core assets underway
- Saltwater and Capital Leases approved and ready for exploration
- New exciting projects attracting major investors

EXPLORATION PIPELINE

- Experienced Team capable of gold discoveries in Australia
- 100%-owned large prospective gold project areas near major gold deposits in underexplored areas
- Potential for multi million ounce gold discoveries demonstrated by discoveries in Pilbara-Norseman and NSW
- JORC 2012 combined resource at Trojan of 144,800 oz. Au
 - Current investigation for possible ~30,000oz. Au underground operation
 - Potential mineralisation open at depth and along strike
- Systematic exploration and targeted drilling across key projects R&D compliant for 43% rebate
- Recognised and secured new opportunities in the Australia wide search
- Major projects in Western Australia
- No debt, low spend with cash and receivables of ~\$1.3M prior current placement, \$4m post placement
 Active, targeted, ongoing in-ground exploration
